

GUARDIANUTM[®]

altitudeangel.com

Digitally manage flight requests through automation and support the safe integration of UAV traffic in your airspace.

Track flights and identify non-conformant activity, aiding safety and security.

Approve/reject flight plans and, where necessary, forward for manual approval, all managed by GuardianUTM's unique workflow with a full audit trail.

A fully auditable platform which gives visibility to all parties and authorities at any time, simplifying internal and UAV pilot communications.

For more information on how GuardianUTM can support your ATC and Operations teams, saving time and money book a demo at hello@altitudeangel.com.
